

**NAKACHARI COLLEGE**  
**FEEDBACK REPORT 2022-2023**

After analysing the feedback reports from the students the following issues are noticed :

1. The feedback forms reveal that the majority of students are satisfied with the class arrangement that the teachers make in creating a positive learning environment.
2. Our students are satisfied with the responses that they get from the teachers whenever they need regarding their physical, emotional and learning problems and challenges.
3. The feedback report also reveals that our students are not satisfied with the proper use of the ICT TOOLS in the class room of the teachers to create a favourable classroom atmosphere in the process.

**Suggestions:**

1. Importance should be given to improve the effective use of ICT TOOLS in the classroom by the teachers to encourage an effective learning atmosphere.
